VIDEO ENABLED JUSTICE / HMCTS (JUSTICE VIDEO SERVICE) APPROVED RANGE

---

## The Short Term Holding Safebooth

A safe, compassionate solution to short term holding for Police, Prisons and Courts anywhere that your operations have a need to hold a person for short periods, initial investigations, searching, awaiting a private consultation, virtual court hearing, probation or parole interviewing or other processes.

Guaranteed 100% ligature free, each short term holding Safebooth is factory fitted with 360-degree internal CCTV recording audio and video, ensuring the safety of the user always.

## The Consultation Safebooth

### Safe & private video/voice consultations

The Consultation Safebooth provides a private place for video enabled legal, probation or ICV oversight in a ligature free Safebooth. Investigators can conduct evidential interviews remotely; solicitors and interpreters join remotely using transformational technology. The Consultation Safebooth makes day to day operations safer for all. Modular, simply relocate as estate demand changes, add new end points as Technology advances. Installed and operational in a day.

Compatible with VEJ and HMCTS Justice Video Service with an externally mounted CISCO DX 80 touch screen PC or end point device of choice, in a ruggedised cradle, internally viewed through toughened safety glass, operated entirely from outside the booth to protect the technology equipment.

## The Live-Link Evidence Safebooth

A robust and flexible solution, integrating systems for Police, Prisons and Courts where there is a need for evidence to be provided remotely by any witness in an agile and 21st century format, utilising transformational technology.

Providing a comfortable, private space to give evidence from a remote location of your choice. Think police stations, patrol or investigative base, MASH, or vulnerable witness suite? You decide where this best supports your witnesses, providing outstanding witness care. Compatible with VEJ and HMCTS, Justice Video Service, with an internally mounted CISCO DX 80 touch screen PC or end point device of your choice, in a rugged cradle, operated from within by the witness or your staff.

## The Virtual Court Room (VCR)

Each VCR is built ligature free, bespoke to joint requirements, in consultation with your local Judiciary. Fitted with comfortable, fixed bench style seating with robust cushions, the VCR is designed to ensure the safety and accommodation of up to 5 of persons, to include interpreter, dock officer and escorts.

Each VCR is compatible with VEJ and HMCTS Justice Video Service and is fitted with an externally mounted CISCO DX80 flat screen PC or device of your choice, internally viewed through toughened safety glass. Operated from outside the VCR by your staff.
